

# C3 brushing machine

Conver offers you the C3 brushing machine. This machine is developed in close cooperation with one of the leading pioneers in the field of weed brushes. His knowledge was combined with a wealth of practical experience and high-quality technology. This way we created a 3-wheel brushing machine that provides excellent productivity and ease of use. The machine is also easy to maintain.

- Thoughtful design
- Easy to maintain
- User-friendly and safe
- Optimal results

**CONVER**

**IT'S IN OUR NATURE**

## Thoughtful design

The Conver C3 brushing machine can especially be used in urban areas. Compact, highly manoeuvrable, efficient and quiet. The machine is 1,1 meters wide, 2,2 meters high and weighs 1.900 kg.

## Easy to maintain

All the components for daily maintenance are easy to access and situated next to one another. For large-scale maintenance the accessibility of all embedded components has been taken into account. The cabin, tanks and side panels are easy to open, flip out or tilt.

## User-friendly and safe

The operator's working area is spacious despite the compact dimensions of the insulated cabin. All components in the cabin are adjustable. The cabin provides perfect visibility all round.

## Optimal results

The small track width and high manoeuvrability give the C3 optimal mobility in urban areas. The perfect brush floating position ensures optimal brushing results while minimising wear and fuel consumption. The brush head has a maximum swivel and tilt range. There's a storage box for spare brushes and tools. The C3 also has a sprayer unit with a 100-litre water tank.

## Available tools

For the C3 brushing machine is a weed brush available with six brush segments, each with hydraulic tilting and side shift functions. The segments are removable thanks to a quick-release system. The weed brush is powered by an OMT-type hydraulic engine. The C3 is delivered without the brush elements.
