

C4 tool carrier

Conver offers you the C4 tool carrier. This machine is developed in close cooperation with her users. Their wishes are combined with a wealth of practical experience and high-quality technology. This way we created a 4-wheel multifunctional machine that provides excellent productivity and ease of use. The C4 has a big lifting capacity and is easy to maintain.

- **Compact allrounder**
- **Power machine**

- **Easy to maintain**
- **Optimal results**

CONVER

IT'S IN OUR NATURE

Compact allrounder

The Conver C4 tool carrier is a compact allrounder. The machine is 1.25 meters wide, 2.40 meters high and weighs 2,350 kg. It has a turning radius approximately 4.50 meters. The machine can be used for a wide range of applications and is easy to control.

Power machine

The Conver C4 has a water-cooled four-cylinder diesel engine developing 56 kW (75 hp) and has a high hydraulic output of 100 litres per minute. The C4 has 100 litres of diesel and 130 litres of hydraulic oil on board. The system is electrically controlled and can be handled with a joystick. The C4 has a lifting capacity of 1,000 kg.

Maximum grip

The C4 has a drive mechanism on all four wheels, so you always have the reassurance of maximum grip. It is also possible to interlock the wheels.

Easy to maintain

All the components for daily maintenance are easy to access and situated next to one another. For large-scale maintenance the accessibility of all embedded components has been taken into account. The cabin, tanks and side panels are easy to open, flip out or tilt.

Optimal results

The operator's working area is spacious despite the compact dimensions of the insulated cabin. All components in the cabin are adjustable. The cabin provides perfect visibility all round. In the summer the driver has the convenience of air conditioning and in the winter of a heater. Everything in the C4 is within arm's reach, even the tools, which can be found in an integrated storage box.
